SUMMARY

Hi, I'm Ever, Software Developer

I became a web developer because
I love solving complex problems and
I want to make a difference.
I am currently based in Rome but
I was bred in Buenos Aires.

"I hear and I forget. I see and I remember.
I do and I understand." - **Confucius**

PERSONAL PROJECTS

Liber — Co-Founder with Jeremias Caceres

2020 - PRESENT

Global collaborative platform that drives physicians, scientists, and medical experts to cooperate on difficult cases. Currently under development. The platform has modules for users (doctors), cases, answers, profiles, etc.

The web application has a registration and login system, profiles, and a case module, the heart of the application, also a professional ID number is needed for a future control module where you verify that the user is a real doctor or professional.
How does it work? The platform is a place where physicians find and share knowledge in a feedback mode. The platform provides a collaborative environment between professionals in which they take center stage by providing the data, expertise, and/or research that those who need it need.

- **Back-End:** Python 3, Django 3
- **Database:** SQLite , PostgreSQL
- **Front-End:** HTML5, CSS3, Bootstrap 4, JavaScript
- **Others:** Git

Portfolio — Professional Web

FINISHED IN 2020

Features such as skills blogs, projects, documentations, contacts, resumes, certificates, ckeditors and more.
Data in the blogs, certifications, projects, documentations and more can be edited, deleted or added through an administrator at the user level, it is not necessary to do so at the code level. This account has a username and password.

- **Back-End:** Python 3, Django 3
- **Database:** SQLite , PostgreSQL
- **Front-End:** HTML5, CSS3, Bootstrap 4, JavaScript
- **Others:** Git, Docker

Glow — Photography Blog

FINISHED IN 2020

Personal photography page where I implement the technologies learned.
Uploading photos is done at user level with an admin, you need the admin user and password to access it.

- **Back-End:** Python 3, Django 3
- **Database:** SQLite (Django ORM)
- **Front-End:** HTML5, CSS3, Bootstrap 4, JavaScript
- **Others:** Git, Docker

La Caffettiera — Commercial Web

FINISHED IN 2020

Web project centered on a commercial store, much in demand by those clients looking to expand their store and provide some services through the web.
It has a blog structured in subcategories, users that can be easily managed, contacts and an API for the product section.

- **Back-End:** Python 3, Django 3, Django REST Framework
- **Database:** SQLite (Django ORM)
- **Front-End:** HTML5, CSS3, Bootstrap 4, JavaScript
- **Others:** Git, Docker
